

## RSL **SPEAKER SYSTEMS**

Chances are that you have already heard RSL speakers, either at Rogersound Labs or at your friends'. So you are probably already aware of the way they sound. Many manufacturers like to use spicy adjectives and claims of technological discoveries in their literature, instead of letting you choose through a plain and simple listening test.

What it really boils down to is two things, how well is the speaker designed and is it built to last? We will allow our 7 year reputation to speak for the design quality of RSL speakers. A large segment of RSL customers come from the entertainment industry. These include recording studios, radio and television stations, musicians, engineers and discos. The balance of this brochure is dedicated to showing you how RSL speaker systems are designed to last.

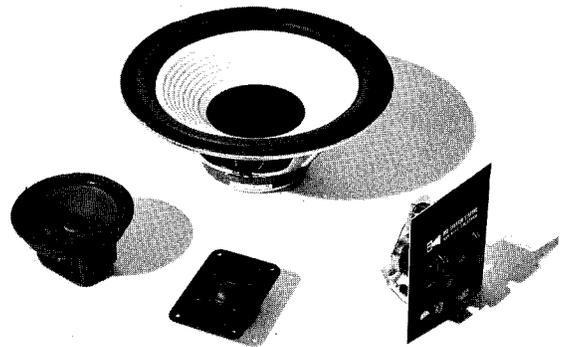

## RSL **MAX**

- ... Offers increased bass response and power handling capacity over the RSL 3300.
- ... Live up front sound. Not muffled.
- ... Floor standing speaker — large enclosure for deepest bass.
- ... High efficiency bass-reflex design. High power is not necessary for satisfying results. (Tremendous savings when choosing a receiver or amplifier.)
- ... All parts are heavy duty for sustained power usage.
- ... 12" 3 way design. All speakers feature oversized magnet structures and close tolerances.
- ... Full 3/4" cabinet construction with the finest walnut laminates finished with hand rubbed lacquer.
- ... Interlocking panel construction and expanded foam gaskets eliminate air leaks and cabinet vibrations.
- ... Removable grill panel that holds tightly to the cabinet.
- ... Soft dome tweeter with large ceramic magnet and aluminum voice coil for superb treble response with good dispersion and high power handling.
- ... Foam rolled edge of woofer for maximum cone travel and deeper bass.
- ... Special high-temperature aluminum voice coil with four layers of windings.
- ... Oversized magnet with thicker armco steel structure yields maximum efficiency and power handling.
- ... Fully adjustable high wattage midrange and tweeter controls on crossover with e.z. hookup terminals (no tools needed).
- ... Crossover features hand wound coils with 18 gauge copper magnet wire and military spec. mylar capacitors for lower distortion.
- ... Fuse protection.

## Specifications

Frequency response: 30-20,000 hz  
Power capacity: 125 watts rms (May be used with amplifiers of higher wattage with reasonable care.)  
Minimum recommended power: 12 watts continuous  
Impedance: 8 ohms  
Crossover frequencies: 800, 4,000 hz at 6 db/octave  
Shipping weight: 60 lbs.  
Dimensions: 32" H x 18" W x 12" D

## Our Guarantees

First, we guarantee that RSL speakers will sound great in your home. If for any reason they don't live up to your expectations, we will be more than happy to take them back within seven days for a full refund. Just return them in a like-new condition with all the packing.

Second, RSL speakers have a liberal five year limited warranty on both parts and labor. Please read the terms in our stores or on the back of the speaker.

Third, in the unlikely event that warranty repairs are needed, we promise to complete them within seven days from the time we receive your speaker or we will supply you with a loaner speaker (for local customers). Our normal repair time is within 24 hours.
