RSL **SPEAKER SYSTEMS**

Chances are that you have already heard RSL speakers, either at Rogersound Labs or at your friends'. So you are probably already aware of the way they sound. Many manufacturers like to use spicy adjectives and claims of technological discoveries in their literature, instead of letting you choose through a plain and simple listening test.

What it really boils down to is two things, how well is the speaker designed and is it built to last? We will allow our 7 year reputation to speak for the design quality of RSL speakers. A large segment of RSL customers come from the entertainment industry. These include recording studios, radio and television stations, musicians, engineers and discos. The balance of this brochure is dedicated to showing you how RSL speaker systems are designed to last.

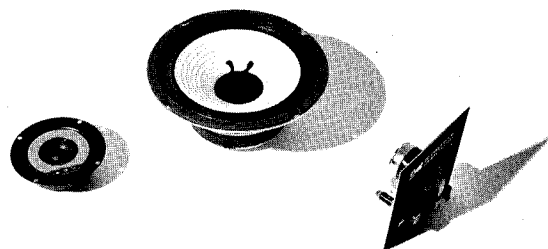

RSL **MONACO**

- ... Designed to yield the same large-as-life sound as the other RSL models, but in a smaller size.
- ... Designed to play louder and handle more power with less distortion than other speakers of comparable price and size.
- ... High-efficiency bass reflex design can be used with inexpensive receivers of low wattage for satisfying results.
- ... May also be used with high wattage amplifiers if reasonable care is used.
- ... 8" woofer contains an oversized magnet structure that is typically used on 12" woofers of other manufacturers. Four layer high-temperature aluminum voice coil for maximum power handling.
- ... Tweeter is similar to RSL 3300 tweeter. Oversized magnet structure and voice coil. Phenolic ring design for superb treble and power handling.
- ... Full 3/4" cabinet construction with the finest walnut laminates finished with hand rubbed lacquer.
- ... Interlocking panel construction and expanded foam gaskets eliminate air leaks and cabinet vibrations.
- ... Removable grill panel fastens tightly to the cabinet.
- ... Foam trap on tweeter eliminates standing-wave distortion.
- ... 2" port increases efficiency of bass. Accordion cloth edge of woofer deepens bass response.
- ... Full adjustable high-temperature wire-wound tweeter control.
- ... E. Z. hook-up terminals in the rear accommodate large wire — no tools needed.
- ... Fuse protection.

Specifications

Frequency response: 50-20,000 hz
Power capacity: 60 watts rms (May be used with higher powered amplifiers if reasonable care is taken.)
Minimum recommended power: 10 watts rms
Impedance: 8 ohms
Crossover frequency: 1600 hz at 3 db/octave
Shipping weight: 34 lbs.
Dimensions: 22" H x 12 1/4" W x 10 1/4" D

Our Guarantees

First, we guarantee that RSL speakers will sound great in your home. If for any reason they don't live up to your expectations, we will be more than happy to take them back within seven days for a full refund. Just return them in a like-new condition with all the packing.

Second, RSL speakers have a liberal five year limited warranty on both parts and labor. Please read the terms in our stores or on the back of the speaker.

Third, in the unlikely event that warranty repairs are needed, we promise to complete them within seven days from the time we receive your speaker or we will supply you with a loaner speaker (for local customers). Our normal repair time is within 24 hours.
