

RSL 6600H

RSL **SPEAKER SYSTEMS**

Chances are that you have already heard RSL speakers, either at Rogersound Labs or at your friends'. So you are probably already aware of the way they sound. Many manufacturers like to use spicy adjectives and claims of technological discoveries in their literature, instead of letting you choose through a plain and simple listening test.

What it really boils down to is two things, how well is the speaker designed and is it built to last? We will allow our 8 year reputation to speak for the design quality of RSL speakers. A large segment of RSL customers come from the entertainment industry. These include recording studios, radio and television stations, musicians, engineers and discos. The balance of this brochure is dedicated to showing you how RSL speaker systems are designed to last.

RSL **6600H**

....Giant column speaker for larger studios, theaters, discos and home installations.

....Our highest efficiency speaker. Can operate on the lowest wattage amplifiers to the highest. Double tuned bass reflex design.

....Larger than life forward sound. Especially good for music at "rock concert" levels. Our most powerful speaker ever.

....3 way design featuring two 12" woofers, two 5" midranges and an ElectroVoice compression horn tweeter.

....All speakers feature oversized magnet structures for increased power capacity.

....Full 3/4" cabinet construction with the finest walnut laminated end pieces finished with hand rubbed lacquer.

....Interlocking panel construction and expanded foam gaskets eliminate air leaks and vibrations.

....Removable grill panel.

....Horn tweeter has an exclusive protection circuit to help prevent damage from accident or abuse.

....5" midranges feature light but stiff cone material, high temperature aluminum voice coils and large magnets for low distortion, increased clarity and power handling.

....Twin sub-enclosure design with two reflex tubes extend bass response while keeping the bass tight.

....Woofers feature cloth edge cones for deeper bass and high temperature voice coils with four layers. Also, oversized magnet structures with armco steel plates.

....Fully adjustable wire wound high-temperature crossover controls with 18 gauge copper magnet wire coils and military spec. mylar capacitors.

....E.Z. hook-up terminals -- no tools needed.

....Fuse protection.

Specifications

Frequency response: 25-20,000 hz.

Power capacity: 200 watts rms (Amplifiers of higher power ratings may be used if care is exercised.)

Minimum recommended power: 10 watts rms

Impedance: 4 ohms

Crossover frequency: 800, 5000 hz. at 6 db/octave

Shipping weight: 90 lbs.

Dimensions: 46" H x 18" W x 11" D

Our Guarantees

First, we guarantee that RSL speakers will sound great in your home. If for any reason they don't live up to your expectations, we will be more than happy to take them back within seven days for a full refund. Just return them in a like-new condition with all the packing.

Second, RSL speakers have a liberal five year limited warranty on both parts and labor. Please read the terms in our stores or on the back of the speaker.

Third, in the unlikely event that warranty repairs are needed, we promise to complete them within seven days from the time we receive your speaker or we will supply you with a loaner speaker (for local customers). Our normal repair time is within 24 hours.
