

RSL SPEAKER SYSTEMS

Chances are that you have already heard RSL speakers, either at Rogersound Labs or at your friends'. So you are probably already aware of the way they sound. Many manufacturers like to use spicy adjectives and claims of technological discoveries in their literature, instead of letting you choose through a plain and simple listening test.

What it really boils down to is two things, how well is the speaker designed and is it built to last? We will allow our 8 year reputation to speak for the design quality of RSL speakers. A large segment of RSL customers come from the entertainment industry. These include recording studios, radio and television stations, musicians, engineers and discos. The balance of this brochure is dedicated to showing you how RSL speaker systems are designed to last.

RSL RANGER

... Sound emphasizes detail and transparency rather than forwardness.

... High efficiency bass reflex design allows choice of lower powered receiver for savings.

... Will handle higher powered amplifiers.

... 10" 3 way design. All parts heavy duty.

... Full 3/4" cabinet construction and expanded foam gaskets eliminate air leaks and cabinet vibrations.

... Genuine walnut veneers - hand rubbed lacquer finish.

... There are no protruding cabinet edges to interfere with sound dispersion, so music opens up and sounds more life like.

... The removeable grill is thin to prevent dispersion problems.

... Dome tweeter with polycarbonite diaphragm provides superb brilliance and efficiency, as well as improved dispersion.

... The 5" midrange is smooth and transparent, so voices and instruments sound live.

... 3" tuned port increases the efficiency of the bass.

... Foam edge on 10" woofer for maximum travel and deeper bass response.

... Fully adjustable wire-wound controls featuring high wattage ratings. Hand wound crossover coil with 18 gauge wire. Also military spec. mylar capacitors. The result is better reliability & higher power handling.

... E.Z. hook-up terminals -- no tools needed.

... Fuse protection.

Specifications

Frequency response: 40-20,000 hz.

Power capacity: 75 watts rms (Amplifiers of higher power ratings may be used if care is exercised.)

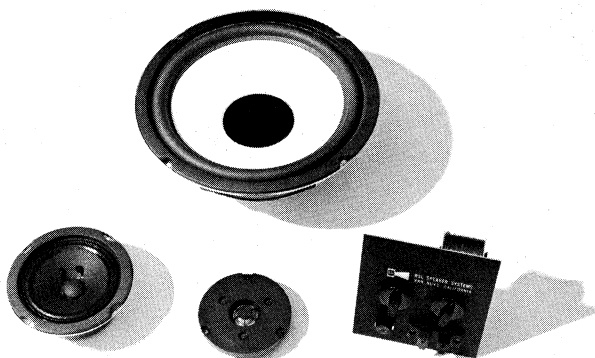

Minimum recommended power: 10 watts rms

Impedance: 8 ohms

Crossover frequency: 800, 5000 at 6db/octave

Shipping weight: 39 lbs.

Dimensions: 25" H x 14 1/2" W x 11 1/2" D

Our Guarantees

First, we guarantee that RSL speakers will sound great in your home. If for any reason they don't live up to your expectations, we will be more than happy to take them back within seven days for a full refund. Just return them in a like-new condition with all the packing.

Second, RSL speakers have a liberal five year limited warranty on both parts and labor. Please read the terms in our stores or on the back of the speaker.

Third, in the unlikely event that warranty repairs are needed, we promise to complete them within seven days from the time we receive your speaker or we will supply you with a loaner speaker (for local customers). Our normal repair time is within 24 hours.
