

The Performance Speaker

The Performance Speakers include a handcrafted furniture quality genuine walnut enclosure (at less than a simulated vinyl cost). Plus, great sounding woofers and tweeters (and midranges in 3 ways) identical to those used in major brands costing triple.

We feel that there are too many inferior quality speaker systems being sold in the less than \$100 ea. price range. Here's how we can offer great quality speakers at less than others' mediocre speaker prices:

- ... We build them in our own factory. You save profit (typically 50%!).
- ... The walnut cabinets were made for

other prestige manufacturers (RSL being one of them). They're seconds because of finish imperfections you probably won't detect.

- ... The woofers, midranges, and tweeters are all first (not seconds) from the following sources: previous RSL models and over-runs, from other major brands (familiar names furnished gladly). This furthers the savings.
- ... Zero unneeded frills. If it doesn't help the sound it isn't there. Further savings.

Supplies on the performance speaker is limited to what is in stock at the time. We suggest quick action.

- ... GENUINE WALNUT VENEER ENCLOSURES WITH CAREFULLY MITERED PANELS.
- ... REMOVABLE CLOTH FRONTS.
- ... WOOFERS FEATURE CLOTH OR FOAM SURROUNDS FOR LARGE CONE EXCURSIONS.
- ... MIDRANGES (IN 3 WAYS) FEATURE SEPARATE ENCLOSURES.
- ... QUALITY TWEETERS FOR CLEAR HIGHS.

- ... ONE YEAR PARTS AND LABOR WARRANTY.

The prices and specifications of the Performance Speakers are subject to change.

Depending on supply, the performance Speakers are available in 8" 2 ways, 10" 2 ways, 12" 2 ways, 10" 3 ways, 12" 3 ways.
